Nursing Homes Ireland - Caring Together

What's Not Fair?

Due to failures of **Fair Deal** pricing:

- It's not fair, private and voluntary nursing home residents receive, on average, **€650 less per bed, per week**, than those in HSE/Public nursing homes. This is an average of **€33,800 per resident, per year**.
- It's not fair **homes have to close due to failures** in Fair Deal pricing.
- It's not fair that **residents are losing their homes**.
- It's not fair that **residents are denied the essential primary care services** they need, simply because of where they live.
- It's not fair that **communities** are losing their local nursing home.
- It's not fair that **families** have to travel long distances to visit their loved ones.
- It's not fair that **staff in private and voluntary nursing homes are not remunerated** on par with public service colleagues.

Fair Deal pricing is not fair. Since 2018, **77 nursing homes have closed**, leading to the **loss of over 2,800+ beds** in local communities throughout Ireland. We need to fix Fair Deal pricing.
